

# Science Assessment Grid : Rainforest Habitats : KS2

Rainforest Habitats																			
Group: <input type="text"/>		Year: <input type="text"/>		Term: <input type="text"/>															
Lesson 1	Can children identify some of the plants in the rainforest?																		
	Can children identify the different parts of a plant?																		
	Can children use appropriate vocabulary to describe rainforest plants?																		
Lesson 2	Can children identify a variety of rainforest plants?																		
	Can children describe a variety of rainforest plants according to their characteristics?																		
	Can children match a plant to its description?																		
Lesson 3	Can children identify a variety of animals that live in the Amazon rainforest?																		
	Can children use a branching database to identify animals?																		
	Can children describe what an animal is like based on a variety of characteristics?																		
Lesson 4	Do children know that the number of species means it is important to be able to sort animals into groups?																		
	Can children identify ways of sorting animals into groups?																		
	Can children sort animals into groups according to various criteria?																		
Lesson 5	Do children know what a food chain is?																		
	Can children explain terms such as producer, consumer, herbivore, carnivore and omnivore?																		
	Can children create food chains to see feeding relationships in the Amazon rainforest?
